SUMMARY

BCA graduate and MERN Stack Developer with hands-on experience building full-stack web applications, RESTful APIs, and secure authentication systems. Proficient in React.js, Node.js, Express.js, and MongoDB. Demonstrated ability to design scalable architectures, implement JWT-based role access control, and deliver responsive UI components. Seeking an entry-level software developer role to apply and grow technical skills.

TECHNICAL SKILLS

Languages: JavaScript

Frontend: React.js, Socket.IO Client, WebRTC, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, MongoDB (Mongoose), JWT (jsonwebtoken), bcryptjs, Socket.IO

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Figma, Thunder Client, Nodemon

Concepts: RESTful APIs, JWT Authentication, CRUD Operations, Role-Based Access Control (RBAC), Real-Time Communication (WebRTC/Socket.IO), OOP, Data Structures

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern | SMEC Labs, Kochi, Kerala

Jul 2025 – Jan 2026

- Worked on real-world full-stack applications, gaining practical experience across frontend and backend development including responsive UIs, REST APIs, and authentication flows.
- Built responsive React interfaces and reusable UI components using React.js, Vite, HTML, CSS, and Bootstrap, enhancing cross-device user experience.
- Worked with Node.js, Express, and MongoDB to support backend features including database design, query optimization, and secure data storage.
- Implemented user authentication using JWT and bcryptjs, and enforced role-based access control (RBAC) to strengthen application security.
- Developed and tested RESTful API endpoints for frontend-backend communication using Thunder Client in VS Code.
- Improved teamwork, communication, and problem-solving skills through collaborative project work; managed source code using Git and GitHub.

PROJECTS

CalmCare – Full-Stack Wellness & Psychology Consultation Platform | *Tech Stack: React (Vite), Node.js, Express, MongoDB (Mongoose), JWT, Socket.IO, Chart.js, Bootstrap*

Frontend: calmecare.vercel.app | **Backend:** calmecare.onrender.com | **GitHub:** github.com/blessen-baby/Calmecare

- Built a full-stack wellness application featuring user authentication, session progress tracking, real-time updates with Socket.IO, and chart-based insights using Chart.js.
- Developed a role-based mental health management system supporting Admin, Patient, Psychologist, and Clinical Psychologist workflows using the MERN stack.
- Implemented real-time communication features using Socket.IO, enabling live session updates between patients and psychologists.
- Integrated Chart.js to visualize patient progress and session analytics with interactive, data-driven dashboards.
- Designed and implemented a secure RESTful backend with JWT authentication, bcryptjs password hashing, and protected multi-role access control.
- Built a scalable Express.js and MongoDB architecture with modular controllers, models, and route separation; deployed with production-ready environment configuration.

EDUCATION

Bachelor of Computer Applications (BCA)*2022 – 2025*

Mangalam MCVC of Arts and Science, Ettumanoor | Mahatma Gandhi University

Computer Science (Higher Secondary)*2020 – 2022*

St. Mary's Higher Secondary School, Manarcad, Kottayam, Kerala

LANGUAGES

English | Malayalam | Tamil | Hindi
