## SUMMARY

---

BCA graduate and aspiring MERN Stack Developer skilled in React.js, Node.js, Express.js, and MongoDB. Experienced in building responsive web applications and backend APIs. Seeking an entry-level software developer role to grow and contribute.

## SKILLS

---

**Languages:** JavaScript

**WebTechnologies:** HTML, CSS

**Libraries & Frameworks:** React.js, Node.js, Express.js, Bootstrap

**Databases:** MongoDB, MySQL

**Tools:** Git, GitHub, VS Code, Figma

**Concepts:** OOP, Data Structures, RESTful APIs, CRUD Operations, JWT Authentication

## PROFESSIONAL EXPERIENCE

---

**MERN Stack Developer Intern– SMEC Labs | Kochi, Kerala**

**08/2025 – Ongoing**

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB, improving application efficiency and responsiveness. Built reusable and responsive UI components using React.js, HTML, CSS, and Bootstrap, enhancing user experience.
- Designed and integrated MongoDB databases, optimized queries, and ensured secure data storage.
- Implemented user authentication, form validation, and role-based access control, strengthening application security.
- Developed and tested REST APIs for frontend-backend communication using Thunder Client (VS Code). Managed source code and versioning using Git and GitHub; assisted in debugging and deployment preparation.

## PROJECTS

---

**CalmCare – Stress-Free Online Physiology Consultation Platform**

**02/2026 Ongoing**

TechStack: MongoDB, Express.js, React.js, Node.js, HTML, CSS, JavaScript, Bootstrap

- Developed a role-based mental health management API using the MERN stack supporting Admin, Patient, Psychologist, and Clinical Psychologist workflows.
- Designed and implemented a secure RESTful backend with JWT authentication and protected multi-role access control.
- Built a scalable Express and MongoDB architecture with modular controllers, models, and route separation.
- Engineered an appointment booking and session management system with structured database schema design.
- Implemented environment-based configuration and production-ready server deployment practices.

Tech Stack: Python, Django, HTML, CSS, JavaScript, MySQL

- Developed a blockchain-based system to securely store and track forensic evidence with tamper-proof records.
- Built a role-based digital platform for managing forensic evidence between police, courts, and administrators.
- Implemented a secure digital chain-of-custody system to improve transparency and prevent evidence manipulation.
- Designed a secure authentication and permission-based access control system to ensure authorized handling of sensitive forensic data.
- Improved interdepartmental coordination by creating a centralized yet decentralized evidence management platform with real-time updates and audit trails.

EDUCATION

---

**Bachelor of Computer Applications (BCA)** **2022 – 2025**

Mangalam MCVC of Arts and Science, Ettumanoor, Kottayam, Kerala  
Mahatma Gandhi University

**Computer Science (Higher Secondary)** **2020 – 2022**

St.marys Higher Secondary School, Manarcad, Kottayam, Kerala
